### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven M. Santisi (Reg. # 40,157) on May 12, 2006.

The application has been amended as follows:

#### IN THE CLAIMS

Claim 15, line 7, delete the phrase "of claim 1."

2. The following is an examiner's statement of reasons for allowance:

While Sakiya et al. (U.S. Pub. No.2001/0048866) shows a wafer carrier opener that includes a wafer carrier door receiver, a horizontally stationary member, and a link as required by the claims, the Examiner agrees with Applicant's arguments Filed February 27, 2006 that Sakiya et al does not disclose a "four-bar link" as the term is defined by the specification and as the term would be understood by one of ordinary skill in the art and it does not allow horizontal movement of the wafer carrier door receiver as required by claim 1. Toshima et al. (U.S. Patent No. 6,454,508) shows a wafer carrier opener that includes a wafer carrier door receiver, a horizontally stationary member, and a four-bar link formed by the receiver, the horizontally stationary member and a pair of links as required by claim 1, it does not allow horizontal movement of the wafer carrier door receiver because it is mounted to move with a vertical rail. Zialek et al. (U.S. Patent No. 6,086,312) shows an article handler having a horizontally

stationary member forming part of a four-bar link with a pair of links and an article handling member that is allowed to move horizontally, however, the horizontally stationary member is not adapted to move vertically and the article handling member is not adapted to receive a wafer carrier door. Finally, Matsumoto (U.S. Patent No. 3,883,105) shows an article handler with a horizontally stationary member and a pair of links that form part of a four-bar link coupled between an article handling member and the horizontally stationary member and a counterbalance adapted to bias the article handling member upwardly, however, the counterbalance forms part of the four bar link instead of horizontally stationary member and the article handling member is not adapted to receive a carrier door as required by claim 1, and the counterbalance is not coupled to the horizontally stationary member and a wafer carrier door receiver as required by claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A. Deuble whose telephone number is (571) 272-6912. The examiner can normally be reached on Monday through Friday except for alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene O. Crawford can be reached on (571) 272-6911. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
